New Construction/installation or Relocating Propane Tank

Customer's Agreement To "Call Before You Dig Requirements"

Customer (print name) _____ agrees to have propane gas lines and all other utilities properly identified and marked before digging, trenching or excavating of any kind may occur.

It is the responsibility of the customer to contact the propane supplier and **Digger's Hotline (800)-242-8511** at least three (3) working days before beginning any type of excavation.

Customer must ensure there are no buried underground electric line(s), gas pipeline(s), water pipe(s), sewer pipe(s), telecommunications line(s), cable or other underground hazards or impediments in the area to be trenched or dug unless otherwise marked by the propane company and Diggers Hotline designated utility company locators.

In the event that unmarked areas receive damage to utility lines while digging, trenching or excavating by Mohican LP Gas Company, the customer agrees to hold harmless the Mohican LP Gas Company for any damages real or punitive.

Physical address work is to occur:

Telephone number:

Alternate: _____

*If this is "New Construction/Installation," the furnace or another appliance must be installed and piped to the outside of the house before we may install the tank, tubing and regulator.
