

Stockbridge-Munsee Isolation/Quarantine Summary - 7/14/2020

Persons who tested positive for COVID-19:

Quarantine will be discontinued once the person with the positive case meets the following:

- 10 days have passed since symptoms first appeared or the positive COVID-19 test result

AND

- You have had no fever for at least 72 hours (that is three full days of no fever without the use of medicine that reduces fevers)

AND

- All symptoms have resolved (for example, your cough or shortness of breath have resolved)

AND

- You received two negative COVID-19 tests in a row, 24 hours apart.

Quarantine Period – Positive COVID-19

Household Contacts of a person who tested positive for COVID-19:

Isolation of the household contacts will be discontinued once the person meets the following:

- 14 days have passed since the person in the household was released from quarantine.

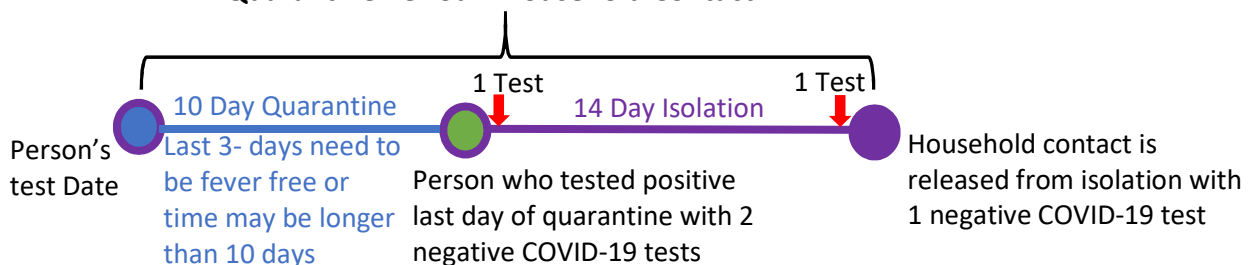

And

- You do not develop symptoms (Fever, cough, shortness of breath, sore throat, muscle pain, loss of taste or smell).

And

- You receive one negative COVID-19 test at the end of the 14-day period.
- If symptoms develop during the 14-day period, you must report symptoms to the SMHWC (715-793-5087). The SMHWC will relay the information to medical providers for further guidance as to a need for testing and isolation/quarantine status.

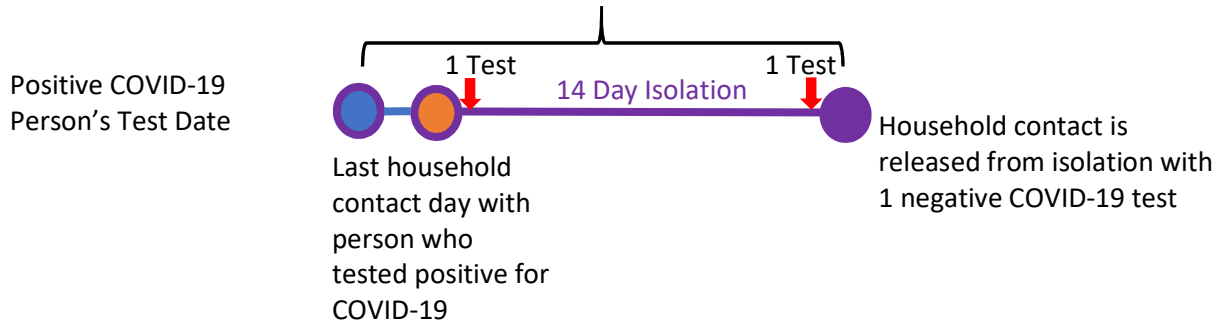

Quarantine Period – Household Contact

NOTE: For people who continued to live in the same house, this 14-day timeframe begins at the end of the quarantine period for the person who tested positive. This requirement is due to the fact that persons living with the infected person could be infected throughout the entire initial quarantine period when the person was infectious.

-If additional household members test positive, the quarantine period starts over for the household.

Quarantine Period – Household Contact – Limited time in Household

NOTE: For people who do not continue to live in the same house (such as if they were a visitor for one night or the infected person is separated into an entirely separate area such as self-contained basement, camper, or cabin), then this 14-day period begins as of the date of last contact with the person who tested positive.

People who have Close Contact with a person identified as having COVID-19 or those who had Close Contact (2 days prior or less) to a person who later tested positive for COVID-19.

People with close contact will be tested for COVID-19. If the person tests Negative they will be placed on isolation for 14 days.

Isolation of the close contacts will be discontinued once the person meets the following:

- 14 days have passed since the person in the household was released from quarantine.

And

- You do not develop symptoms (Fever, cough, shortness of breath, sore throat, muscle pain, loss of taste or smell).

And

- You receive one negative COVID-19 test at the end of the 14-day period.
- If symptoms develop during the 14-day period, you must report symptoms to the SMHWC (715-793-5087). The SMHWC will relay the information to medical providers for further guidance as to a need for testing and isolation/quarantine status.

Quarantine Period – Close Contact
