### **Section 106 Consultation Procedures**

The Stockbridge-Munsee Community Tribal Historic Preservation Office (THPO) has transitioned to a new project management system for all new incoming Federal Section 106 and NEPA reviews as well as State and local consultation requests. Effective immediately, the process for submitting new project reviews is as follows:

- Project reviews and associated documents must be sent electronically (emailed) to: **[thpo@mohican-nsn.gov](mailto:thpo@mohican-nsn.gov)**
- Electronic submission through this account will be our only mode for reviews. We cannot guarantee that hard copy mailed documentation will be reviewed.
- After the initial project review has been submitted, a member of the Stockbridge-Munsee Community THPO staff will review and if potential interest or concerns are noted will reply with comments.
- If we do not respond within the consultation window of 30 calendar days with requests for information or with our determination of project effect, the Stockbridge-Munsee's THPO response should be understood to be “no comment” regarding the proposed undertaking.

Thank you for adhering to these procedural changes moving forward. We anticipate that this will lead to greater efficiency in the cultural resource review experience.

Sincerely,

Nathan Allison  
Tribal Historic Preservation Officer and Archaeologist
