

Transition of Veteran and Beneficiary Online Sign-in Options

Today, VA will announce the start of our transition to a simpler and more modern online sign-in experience for Veterans and other beneficiaries who access VA online services.

In 2025, VA will transition from four online sign-in account options (Login.gov, ID.me, My HealtheVet, and DS Logon) to two sign-in account options: **Login.gov** and **ID.me** accounts. Veterans will be able to use either of these two options to sign in to VA.gov, VA mobile applications, and other VA online services.

Veterans and other beneficiaries will no longer be able to use usernames and passwords for My HealtheVet after January 31, 2025, or DS Logon after September 30, 2025. After these deadlines, Veterans who have not yet transitioned will still be able to access their data and can resume managing their benefits and services online once they have created their new account.

This transition helps us meet Veterans' requests for a simpler sign-in experience while continuing to improve our security standards, comply with federal policies, and enhance Veteran data and identity protection.

We know this transition will be difficult for some Veterans and are committed to partnering with you to provide consistent outreach and support. Training and resources will be provided to help VA staff and Veterans Service Organizations support Veterans in selecting the account and multifactor authentication option that best suits their needs and preferences. We are dedicated to making sure that all Veterans, including those using assistive devices (like screen readers), have the support they need to successfully make this transition.
